

MAKING LIFE EASIER

WELCOME HOME

Imagine driving up to your garage and pressing a button to see the door effortlessly roll up and away from sight. No more getting out of the car in all weathers and struggling to unlock and lift a heavy garage door.

Our range of Automatic Roller and Sectional Garage Doors make life easier for you but they offer much more than just convenience.

Their compact design creates extra space in your garage and your driveway and their insulation and acoustic qualities are five times better than a conventional steel door.

All doors are made to measure and our combination of finishes, colour and design options ensure that they fit perfectly with the look and feel of your home.

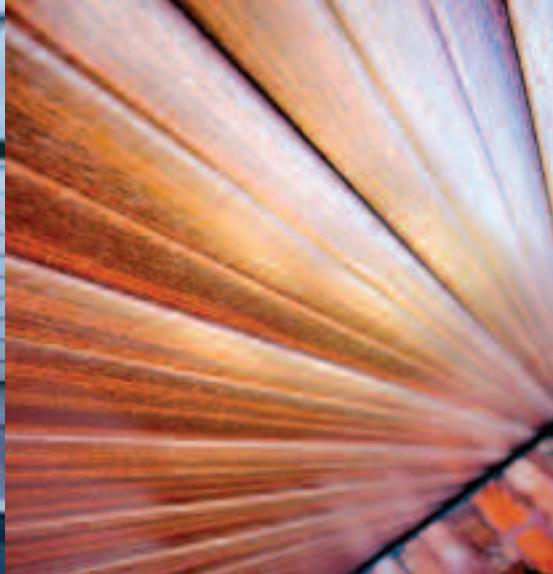

Whilst it is important that your door is aesthetically pleasing, it is only part of our brief - utilising high-quality materials, top-quality manufacturing and our 15 years of expert craftsmanship ensures that your door not only looks good but continues to work effortlessly for many years to come.

SPACE SAVING

Perfect for the short driveways or for those that open onto the street. They allow you to park your car close up to the door and they don't block off ceiling space inside your garage. Bespoke manufacturing increases the width and height of your garage opening.

EFFORTLESS OPERATION

Perfect for the elderly, as well as the modern family, at the touch of a button you can see your garage door rise smoothly as you approach your driveway. Courtesy lighting aids your exit from the garage.

ENHANCES YOUR HOME

Your door can be supplied in a wide choice of attractive colours, finishes and designs. Their insulation and acoustic qualities retain warmth and reduce noise. Whatever the style of your house we have a door to compliment your home.

SAFETY AND SECURITY

All doors are fitted with a safety edge or beam and an anti-drop safety brake to prevent accidental trapping or personal harm from a descending door. Each door also has an automatic drive down locking system and can incorporate a security alarm to deter intruders.

AUTOMATIC SECTIONAL GARAGE DOORS

The principle behind it is as ingenious as it is simple: The sectional garage door is comprised of individual elements, (called sections), which are connected together by hinges. This way the garage door is able to open vertically while conveniently rolling upwards and underneath the ceiling without requiring any additional space for swinging outwards in front of the garage.

Sectional garage doors are also extremely attractive in design. High-quality materials, top-quality manufacturing and an extremely wide variety of optional extras, including glazing, intergral doors and finishing options give your garage an individual look – in keeping with the architecture of your house and your own personal taste.

CLASSIC TO MODERN GLAZING STYLES

You've envisaged a garage door with a certain pattern and colour, but it's still not individual enough for you? Then take a look at our attractive glazing options. They not only make a feature of your garage, but also let the light in as well, especially appealing if you also use your garage as a storage room or workshop.

MATCHING DOORS

There are a number of door options to further enhance the functionality of your sectional door, meaning that you can enter your garage without opening the full garage door. The 'wicket' door can be mounted in the garage door itself (left, right, or centred) or as a separate entrance.

INSULATED AND SOUND PROOFED

Our steel sections are manufactured in a double-skinned sandwich construction and filled with an elastic PUR rigid foam core. This ensures higher heat insulation in comparison to singleskinned garage doors. The flexible lip seals between the sections fit softly even at low temperatures and prevent any heat losses and dust from penetrating.

DESIGNED TO MATCH YOUR HOME

Our Sectional Garage Doors are available in 4 different finishes and a number of colours to compliment your home. The finish and colour combinations will ensure that your new garage door will compliment any style of architecture and decor.

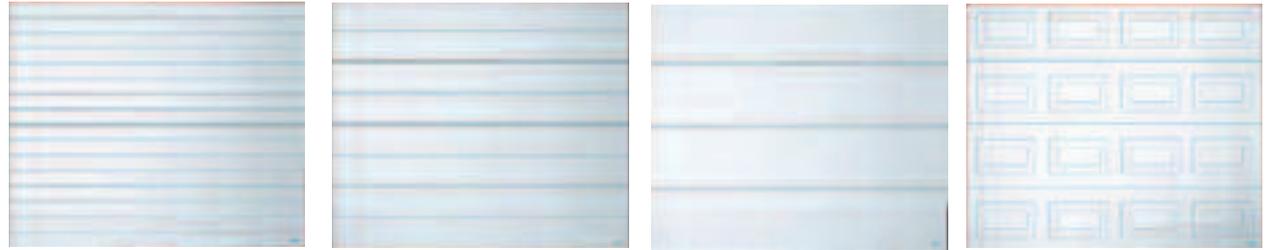

A WIDE CHOICE OF GARAGE DOORS

Our Sectional door range has a wide choice of section panel designs and because of the unique construction, your door can be sectioned for vertical opening.

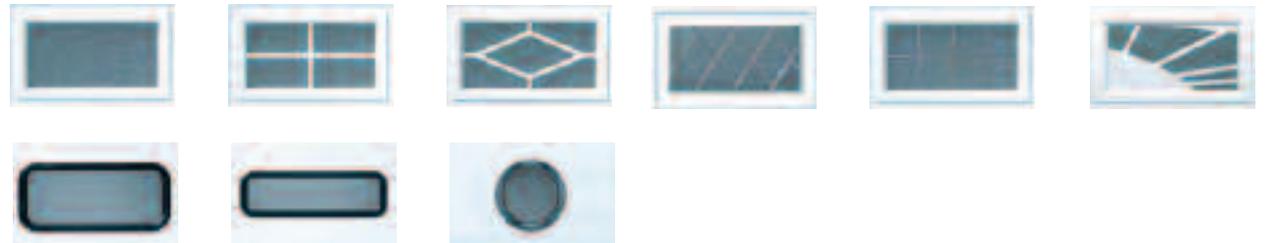

We also have a bespoke design service which allows you to work with our team of design engineers to achieve the look you have always wanted and make you stand out from the crowd!

A RANGE OF GLAZING OPTIONS

There are a number of glazing options which can be incorporated into your door - choose from the standard range or speak with our design engineers for that personal touch.

HORIZONTAL SECTION DESIGNS

GLAZING OPTIONS

GLAZING AND INTEGRAL 'WICKET' DOORS

As well as the glazing style itself, there are also a number of different ways in which the glazing can be applied, providing an almost endless array of possibilities.

For the ultimate in style you could choose to have a 'wicket' door installed, meaning that to gain access you don't have to open up the whole of the garage, and it will fit seamlessly with your chosen design.

Why not combine the two and have an integral door and glazing!

GLAZING APPLICATIONS

INTEGRAL 'WICKET' DOORS

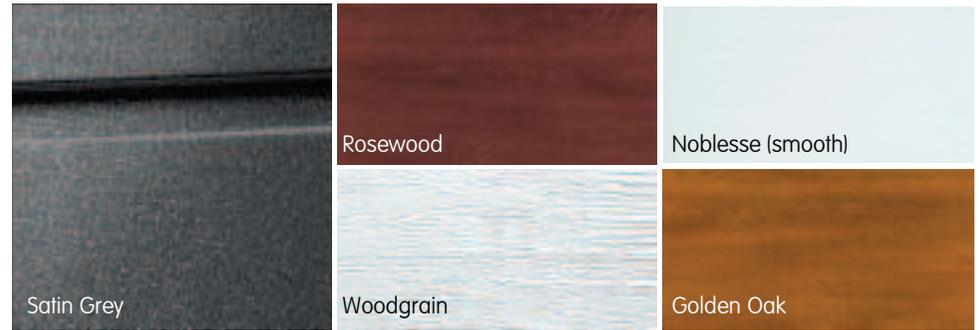

A WIDE CHOICE OF SURFACE FINISHES AND COLOURS

Excel Sectional Garage Doors are available in a range of five finishes and a host of colours too numerous to show here! Please contact us for a full colour range. These durable factory-coated finishes eliminate the need for painting and ensure that your door continues to look good for years and represents a sound investment for your home.

Once installed, Excel Sectional Garage Doors are very low maintenance and come complete with a comprehensive 3 year guarantee on all polyester painted finishes.

FINISHES

A choice of five different surface finishes.

A RANGE OF COLOURS

This is just a small sample of some of the popular colours available.

OPERATIONAL EXTRAS

The sectional garage door has an extremely wide range of optional extras to further enhance your user experience.

Wireless key switch

Standard wireless keypad

Replacement or extra key fob transmitters

Internal rocker switch

Standard wireless keypad

LED light Kit

OPERATIONAL EXTRAS

Operational extras include extra hand transmitters, wireless key pads (both stainless steel or membrane buttons), wireless keypads, key entry keypads and internal rocker switches. You can also enhance the look and functionality of your door by adding custom LED lights which can be programmed to come on at certain times or when the door is in use. We also have a number of door handles in different materials, finishes and colours.

KEY FEATURES AT A GLANCE

Whether your house is built in the traditional country house style and modern semi detached, our range of garage doors provides a full range of options to fit perfectly with your home.

To view all the options available to you why not visit our website at www.excelrollergaragedoors.co.uk

Safety First

Safety brakes and edges are fitted as standard to comply with EN12453 - Safety in the use of power operated garage doors. The brakes lock off, like a seatbelt, if the motordrive or motorbrake fails, which in turn stops the door dropping.

Security Locking System

An automatic drive down locking system combines with high polyamide links to ensure that the door cannot be forced up when lowered.

Manual Override

A manual override unit enables the door to be wound up manually in the event of a power failure.

Power Drive Unit

High quality tubular motor, with manual override.

Automatic Operation

The doors are operated by a remote keyfob handset.

High Thermal and Sound Insulation

The doors are made from interlocking twin wall aluminium sections containing CFC free foam to give great insulation from noise and the elements.

Weatherproof

Rubber seals to the sides and along the bottom of the door ensure your garage remains dry.

Smooth and Quiet

Our doors incorporate a double roller system with soft lead rollers powered by 'Somfy Motors', the world leaders in the motorisation market, also our tracks are brush lined - all adding up to the ultimate in quiet and smooth operation.
